## About Nichrome

### + Born to Lead

Nichrome is the pioneer of VFFS machines in India and has revolutionised packing and distribution of milk by developing India's first indigenous milk pouch machine in 1977. Since then, Nichrome has been on the forefront of developments in this industry by working relentlessly on every single parameter – technology, material, application development, packing size and so on. Every single Nichrome product represents this legacy of leadership through a series of firsts.

### + Beyond Packaging

Nichrome offers an end-to-end solution in packaging including upstream and downstream automation (pre and post packing solutions) that include operations from material storage, distribution feeding solutions, post packing Baling solutions, conveying, collating, case packing, boxing and pelletizing solutions, date coding, check weighing, labeling etc. each integrated seamlessly into a system, handled with high degree of accuracy and perfection resulting in better efficiency and economy.

### + Truly Total

'Total Solution' is a clichéd phrase that has nearly lost its meaning. Not so with Nichrome! Nichrome offers an unending array of solutions for a variety of products – solids, liquids, pastes, viscous products, sticky and abrasive products..., using variety of laminates and co-extruded packaging films in a range of sizes – 1 gram to 50 kg, at highest of speeds, in various pouch styles, with various packing materials. With such a proven track record, you are sure to find the right solution for your specific requirement with Nichrome.

### + Customer Trust

Nichrome's customer represents a virtual who's who of various industries like Food, Dairy, Agriculture, Snack Food, Pharma, Consumer Products, Chemicals and many other industries with over 5000 installations in over 40 countries worldwide, Nichrome brings to the Table matchless experience in meeting the needs of customers.

**THE PLUS FACTOR**  
**IN PACKAGING**

### + Manufacturing Capabilities

Nichrome has a world class modern manufacturing set up spread over 8 acres of land at 'Shrimal', about 40 km south of Pune. The modern manufacturing infrastructure has more than 150 skilled workforce for planning, engineering, supply chain, machine assembly, extensive product trials and testing, commissioning and service. Nichrome follows Lean - Line manufacturing concept wherein dedicated teams are responsible from execution to customer support functions. Nichrome has ISO 9001-2008 quality certification and is also certified under the ISO 22000:2005 for food safety management system - exceeding the requirements of HACCP only machinery manufacturer from India.

### + Research and Development

The R&D wing at Nichrome is recognized by DSIR (Govt. of India) and is equipped with the state of the art 3D modeling software, parametric designing capability, product data management facility and other design tools. The rich 30 years experience and the product driven design approach enables functional and economical machine designs that are customized for the application.

### + Customer Support

Nichrome believes that a True packaging solution is an optimum combination of Product to be packed, Packaging machine and Packing material. There are several factors such as the product behaviour and characteristics, the packing material, package style, pre and post packaging systems and so on. Nichrome has carefully documented the packaging system experience gained over last 30 years. This knowledge and experience along with product domain knowledge ensures an optimum packaging solution.
